A ONE-WEEK CAREER EXPLORATION CAMP FOR HIGH SCHOOL STUDENTS INTERESTED IN AVIATION OR AEROSPACE

• Fly an airplane  
• Learn navigation  
• Learn about aviation careers  
• Visit an air traffic control facility  
• Learn how an airplane flies  
• Build a wood plane  
• Learn to fly by instruments only  
• Preflight an airplane  
• Meet new people  
• Spend time on a college campus  
• Did we mention fly an airplane?

Sponsored by the FAA and the University of North Texas and hosted by Tarrant County College (TCC), ACE Camp provides high school students (11th grade through graduated seniors) the opportunity to explore aviation and aerospace careers.

Students will receive an introductory flight, get behind the controls of and fly an aircraft, learn how an airplane flies and how a jet engine works.

ACE Camp will enable students to make informed decisions as they consider college and career options.

Once they complete the program, students will be more knowledgeable about the importance and diversity of aviation and aerospace careers, how aviation and aerospace industries have developed and grown to what they are today and are aware of future career opportunities and developments.
